## DEAN'S ADDRESS

Dear Colleagues, Students, and Friends,

It is with great pleasure that I would like to share with you another impressive compilation of our activities at FASS. In the last six months, we have organized multiple events, workshops, received international and national recognition and have worked tirelessly to bring forth new projects. I also would like to note that some of the most notable accomplishments in this period belong to our graduate students. Our doctoral students presented their work in international conferences, received TUBITAK grants, published their work in reputable journals. We are proud of their accomplishments and academic performance. Students in our master's programs received outstanding offers and scholarships for PhD programs in top ranking schools in the USA and Europe. As part of our academic community, our graduate students are working incessantly for their teaching and research activities. Their hard work is recognized at all levels as reflected in this Newsletter. We are proud of our ever-expanding graduate alumni and grateful for their contributions to the scientific community.
